- Insulation: Kema Class II (double Insulated)
- Safety norm: acc. to European CENELEC requirements, UV type III
- Number of safety goggles: 2

Easy to use
- Height Adjustment: with gasspring, 67-97 cm

Product highlights

PowerTan face tanner
The PowerTan face tanner comes with a 400W HPA lamp for great facial tanning.

10 Philips Cleo Performance S tubes
Philips Cleo Performance S tubes ensure an optimal and even tanning result in a short amount of time.

Foldaway upright storage
The sun canopy can be folded away and stored upright in order to save space when not in use. It can also be easily stored out of sight, without taking up a complete room in your home.

4 wheels for easy transportation and storage
The 4 Castor wheels make it easy to transport and store the sun canopy.

Comfortable tanning on your own bed or sofa
As the sun canopy is a 1-sided tanning appliance, you can use it lying down where you are most comfortable. It is easy to fold out over a bed or sofa.

Easy height adjustment
The height of the sun canopy can be adjusted easily between 67 and 97cm, depending on the height of your bed. This ensures an optimal distance from your body to the canopy. There is a gasspring in the stand which makes the lifting of the canopy light and makes the use of a bolt redundant.

Acrylic sheets for body protection
The acrylic sheets protect your body from contact with the lamps in the unlikely event that the Suncanopy tips over. The sheets make it impossible for your body to come into direct contact with the lamps.

Automatic shut-off with double safety function
The Sunbed automatically shuts off after 30 minutes to prevent you from tanning too long (e.g. when you fall asleep while tanning). The double safety function ensures that the Sunbed also shuts down if the timer fails.

2 pairs of eye-protecting goggles
Two pairs of goggles are included, to protect your eyes from the UV light.

Body and lamp cooler with 2 silent fans
Combined cooling of the lamps and the users' body by means of 2 silent fans.

Electro-mechanic timer
The electro-mechanic timer allows you to set the length of your tanning session to suit your preference.
